

Road resealing program 2023-24

Our road resealing program helps to keep maintenance costs down, extend the life of the underlying pavement and minimise expensive rehabilitation work.

Roads and car parks will be resealed with bitumen or asphalt. We aim to reseat bitumen roads every 10-15 years and asphalt every 15-18 years. Bitumen resurfacing involves an application of bitumen covered by a layer of aggregate. Asphalt consists of aggregate, filler and binder which are mixed together then spread and compacted while hot, resulting in a smoother surface.

Our 2023-24 Operational Plan provides a budget of \$2,064,218 for resealing the following local urban roads.
