

Road resealing program 2022-23

The reseal program helps to keep maintenance costs down, extend the life of the underlying pavement and minimise expensive pavement rehabilitation work.

Roads and car parks will be resealed with bitumen or asphalt. Bitumen resurfacing involves an application of bitumen covered by a layer of aggregate. Asphaltting consists of aggregate, filler and binder which are mixed together then spread and compacted while hot, resulting in a smoother surface.

Bitumen		
Suburb	Road	Area
Batehaven	Edward Road	Corrigans Crescent to Irene Avenue
Batemans Bay	Deep Creek Dam Road	Full length
Batemans Bay	Hughes Street	Full length
Bingie	Kelly Road	From 0.63km to end of seal
