Special Frequency 1: means collect and store sample monthly, at the same time as Biochemical Oxygen Demand or Total Suspended Solids sampling. If the Biochemical Oxygen Demand or Total Suspended Solids 100 percentile concentration limit is exceeded as per condition 1.3., then analyse the stored sample for chlorophyll a and report results to the EPA as soon as the results become available.

Special Frequency 2: means weekly during the months of November, December, January, February and March (the aim being weekly sampling during these months)

A composite sample: is defined as at least three grab samples forming a pooled sample, with the first and last samples taken at least seven hours apart. The requirement to use composite sampling does not commence until 30 September 2005. Until this date, representative samples must be collected.
